

EDUCATION

University of Toledo

Toledo, OH

Bachelors of Science in Computer Science and Engineering; GPA: 3.5

Expected Aug 2026

- Relevant Coursework: Data Structures & Algorithms, Machine Learning, NLP, Database Systems, Web Development, Computer Vision, Operating Systems
- Peer Mentor, Object-Oriented Programming: Supported 40+ students with assignments, projects and labs using Java on Eclipse IDE.

TECHNICAL SKILLS

Programming: Python, JavaScript, Java, TypeScript, C++, SQL

AI/ML: RAG, Vector Search, PyTorch, TensorFlow, NLP, Prompt Engineering

Frameworks & Backend: React, Next, FastAPI, Node.js, REST, MongoDB, MySQL, PostgreSQL, WebSockets

Cloud & DevOps: AWS (EC2, Lambda), Docker, CI/CD, MLOps

EXPERIENCE

University of Toledo

Toledo, OH, USA

IT Support Specialist III

Jan 2024 – Present

- Automated ticket creation workflow by integrating Selenium, SQL, Power Automate, and iSupport, reducing manual ticket creation time by **20%**.
- Administered PowerShell-based automation for device provisioning and security patches over 12k+ Windows/Linux environments via Microsoft Intune.
- Optimized VMware/Azure AD identity workflows using SQL scripting to improve system reliability.
- Mentored 14 IT Student Assistants; implemented structured review process improving resolution SLA adherence.

Headstarter

Long Island, NY, USA

Software Engineer

Aug 2024 – Oct 2024

- Developed 5 production-ready AI applications using Next.js, React, Firebase, and OpenAI APIs, building robust architectures with secure authentication.
- Increased application scalability and deployment reliability by deploying infrastructure on AWS EC2 and Vercel with automated CI/CD pipelines.
- Architected vector search pipelines using OpenAI embeddings and Pinecone for context-aware outputs in RAG systems.
- Launched payment integrations (Apple Pay/Credit Cards/Klarna) via Stripe for zero-downtime releases.

Creative Liquid Coatings, Inc.

Montpelier, OH, USA

Technical Program Manager

May 2024 – Aug 2024

- Engineered a scalable Microsoft SharePoint Intranet with Power Automate flows resulting in a 99.99% uptime, and reduced deployment times for 25+ program managers.
- Improved manufacturing project tracking across 7 firms by developing a Phase Gate tool utilizing Excel, Oracle Database and ERP.

PROJECTS

ToolTally — AI-Powered Tool Management | *Raspberry Pi 4B, PyTorch, OpenCV, YOLOv8* | [GitHub](#) *Feb 2026 – Present*

- Trained and optimized a custom YOLOv8 multiclass detection model on a curated dataset of 4.5k+ images; achieving a V1 accuracy of 86% across 3 industrial tools.
- Boosted V1 accuracy from 0.863 to 0.897; integrated OpenCV and Ultralytics on Pi for sub-sec predictions.
- Implemented GPIO-based control logic to actuate servo motors and mechanical flaps triggered by model predictions.

Exploratory Data Analysis | *Python, PostgreSQL, PowerBI* | [GitHub](#)

Jan 2026 – Feb 2026

- Engineered a Python ETL pipeline using category-specific median imputation to clean and analyze 3.9k+ retail records.
- Designed a Power BI dashboard with DAX measures to visualize revenue drivers; integrated a PostgreSQL backend to rank product performance.

Real-Time Sports Broadcast | *Node.js, PostgreSQL, WebSockets, ArcJet* | [GitHub](#)

Nov 2025 – Jan 2026

- Architected a high-fidelity sports engine using WebSockets, achieving sub-10ms latency; implemented heartbeat logic and prevented memory leaks from ghost clients.
- Designed a Pub/Sub subscription model to route targeted match updates, optimizing bandwidth by 33% for live users.
- Hardened infrastructure using ArcJet for rate limiting and bot protection, securing the handshake against DDoS attacks.
